

DEDICATED TO THE INDUSTRY  
**API ELECTRIC** EMPLOYEES  
EARN LEED ACCREDITATION

Project Manager Wesley Blake

January 20, 2010 — **API ELECTRIC'S** Project Manager Wesley Blake and Project Engineer Adam Hopp have both earned the Leadership in Energy and Environmental Design® (LEED) Green Associate credential.

Both also received their associates' degree in Electrical Construction Design and Management from Dunwoody College of Technology in 2008 and 2009 respectively.

LEED professional accreditation distinguishes building professionals with the knowledge and skills to successfully steward the LEED certification process. The Green Building Certification Institute established with the support of the U.S. Green Building Council, handles exam development and delivery of the credentialing program.

Project Engineer Adam Hopp

APi Electric offers a full line of electrical construction services to the Mid-West region including: ductbank construction, energy management systems, high voltage and industrial wiring. ⚡
