March 12, 2010 – Minneapolis-based **LEJEUNE STEEL** ranks as one of the Minneapolis/St. Paul Business Journal's Top 25 Target Field Subcontractors.

The Target Field project is also the March 2010 cover story for the McGraw Hill Construction's Engineering News-Record (ENR) magazine. The national publication highlights the project being turned over to its owner three months ahead of schedule.

"As an organization, we couldn't be more proud of our contribution as one of the top subcontractors on a marquee project like Target Field," said Stephen Prince, LeJeune's project manager for the Target Field. "Many people put a lot of effort to make sure this project was a success, and the end result couldn't be more rewarding."

LeJeune's signature projects include the new Minnesota Gopher's TCF Bank Stadium, Mall of America, Wells Fargo Center, Children's Hospital of Wisconsin and many other landmarks in Minnesota, Wisconsin and Illinois. ✪
